

Let Life Shine

Many people could have changed the world, but nobody will no. Only God. Abortion has probably stopped people from doing amazing things.

Doctors are in school for seven years before they can become a doctor. But, some doctors take the wrong path, and now they abort babies.

Mothers, then, need to make a choice to either abort their baby, have the baby and take care of their child, or have the baby then put it in an orphanage. Millions of babies have been aborted. Over the years, people have been getting confused about simple things such as, there are only two genders, a boy can't be a girl, a girl can't be a boy. And abortion needs to stop! We don't have the best President right now, but we still need to have hope. The point is, nobody anywhere should be aborting babies, because these babies turn into an adult and maybe get married. Stop killing innocent babies! Let them grow old and die from natural causes, let them have children, let them be free. The government is confused,

They should not be allowing abortion. So make the right choice today and stop abortion. Pray for our President, Pray for our government, stay hopeful. God has a plan for us, so trust him.
